

Dr. Charles Nutting

Minimally-Invasive, Image-Guided
Procedures for Better Health

PROSTATE ARTERY EMBOLIZATION (PAE)

Treats: Symptoms of Benign Prostatic Hyperplasia (BPH) such as weak stream, frequent urination, urgency.

VARICOCELE EMBOLIZATION

Treats: Enlarged veins in the scrotum that can cause pain, testicular discomfort, and male infertility.

LIVER EMBOLIZATION

Treats: Primary or metastatic liver tumors by delivering localized therapy directly to the cancer.

KNEE EMBOLIZATION (Genicular Artery Embolization – GAE)

Treats: Pain from osteoarthritis of the knee when conservative treatment isn't enough.

FIBROID EMBOLIZATION (Uterine Fibroid Embolization – UFE)

Treats: Uterine fibroids — noncancerous growths causing heavy bleeding, pain, or pressure.
